

## 1- Update the navigation component with 2 menu items

Teachers → Go to path `/teachers`

Students → Go to path `/students`

*<navigation>*

## 2- Update the router, to map the path to the components

path **/teachers**  TeacherView **component**

path **/students**  StudentView **component**

```
import TeachersView from "../components/teachers/TeachersView.vue";
import StudentList from "../components/students/StudentList.vue";
import StudentDetails from "../components/students/StudentDetails.vue";

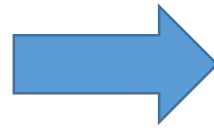

const router = createRouter({
  history: createWebHistory(),
  routes: [
    
  ],
});

const app = createApp(App);
app.use(router);
app.mount("#app");
```

### 3- On student card

- Instead of 'Show Detail' button , put a **router link** to link to /student/::studentID

CLICK

**Name : Manuel Lorenz**

Show Details

### 4- Update the router, to map student/::studentID to the StudentDetails component

path /student/:studentID

StudentDetails **component**

- The student id should be given to the **component using the props !!!**

### 3- On student details

http://localhost:8080/**students/1**

**Name : Manuel Lorenz**

Age : 21

1- Get the data from PROPS and INJECT :

✓ - Get studentId from **PROPS**

✓ - Get students from **INJECT**

2- write a computed property to get the Student from the student list and student id

3- Display the AGE and NAME of student in the view
